

Learning Experience Curriculum Outline for Year 6

This experience will begin on Monday 5th January

The learning taking place

- At the beginning of the two week experience, as a class, the children will be planning and carrying out investigations to find out about forces.
- We will be focusing on the importance of identifying variables and only changing one variable to make our experiment a fair test. We will also be finding out how to make our results more reliable.
- The children will then be researching an area of physics, of their choice, which they will then be sharing with the rest of the class in the form of a presentation.
- Finally the children will be working in groups to plan, carry out and evaluate a scientific question which captivates them.
